**Seminar/workshop on
Developing key competences by problem solving method**

Mariá Slavičková og Iveta Kohanova

Developing of key competencies is one of the main objectives of education in many world countries. One of the appropriate methods which enable the acquisition of key competencies is method of problem solving. The activity of the workshop will focus on identification of key competencies which might be developed through given mathematical tasks and also on creation of such tasks for secondary school pupils.

Mariá Slavičková and Iveta Kohanova are visitng from Comenius University, Bratislava, Slovakia in the mobility project MiM, Move in Mathematics.
