

Seminar 11.15 – 12 in J 2009 Friday 11 June

Damas Gruska:

Slovak educational reform (mathematic & informatics)

Slovak educational reform - from elementary schools to universities - will be briefly sketched with emphasis on education in mathematics and informatics. Background, historical contexts, purposes of the reform as well as problems and a criticism will be presented and discussed. At the end some possible future developments will be outlined.

Damas Gruska is a teacher and vice dean for IT at the Faculty of Mathematics, Physics and Informatics at the Comenius University in Bratislava. He will visit UiA 5 – 13 June as part of mobility in the project *Move in Mathematics* with UiA and the Comenius University
