

UNIVERSITETET I AGDER

# NORDIC GRADUATE SCHOOL IN MATHEMATICS EDUCATION

The Nordic Graduate School in Mathematics Education is situated at University of Agder in Norway and started working on the first of January in 2004.

The Nordic Research Board, NordForsk, supports the Nordic Graduate School in Mathematics Education for five years – from 2004 to 2008.

## WHAT IS THE AIM OF A NORDIC GRADUATE SCHOOL?

The aim of the Nordic Graduate School in Mathematics Education is to:

- > Support and develop the education of researchers in mathematics education in the Nordic and Baltic countries
- > Create constructive cooperation in order to raise the scientific quality of research in mathematics education
- > Give all doctoral students in mathematics education access to the activities of the Graduate School

- > Create cooperation among a greater group of doctoral students and supervisors in order to share experiences
- > Provide opportunities to improve the education of researchers

The utmost aim is to create a network of cooperating partners, who can continue to collaborate after the five years of the Graduate School.

## ACTIVITIES IN THE NORDIC GRADUATE SCHOOL

The graduate school will be open to all doctoral students in mathematics education in the Nordic and Baltic countries and their supervisors. The main activities are:

- > Common courses created with the added competence from all researchers in the Nordic countries and international partners
- > Summer schools building on earlier good experience from similar arrangements
- > Seminar-series in specific research areas as a complement to local series and workshops on subjects or issues of main importance
- > Competence development for supervisors and exchange of experience
- > Partnership and collaboration with distinguished international scholars
- > Creating a database for ongoing work, theses and greater development work in mathematics education

- > Mobility stipends and special financial support for doctoral students

Doctoral students are encouraged to seek necessary support from the graduate school for future courses and activities. See web page [www.nogsme.no](http://www.nogsme.no)

### The board of the Nordic Graduate School in Mathematics Education

Barbro Grevholm (chair)  
 Trygve Breiteig (Norway)  
 Gudny Helga Gunnarsdottir (Iceland)  
 Ole Björkqvist (Finland)  
 Mogens Niss (Denmark)  
 Christer Bergsten (Sweden)  
 Madis Lepik (Estonia)

International centers of excellence are working partners.
