Interactive 3D-plots with jsxgraph in STACK - A tutorial, by Jonas Julius Harang, NTNU

Abstract:
As part of the IDIAM-project we have created a tutorial-resource on how to use interactive 3D-plots and figures as a part of automatically assessed math questions in moodle/STACK. We will show off our tutorial-resource, demonstrate how to use jsxgraph in conjunction with STACK and discuss the benefits and drawbacks of an interactive tool like jsxgraph in e-assessment and in general.
